Hail Impact Tested Roofing

All Unified Steel™ panels provide Class 4 Hail Impact Resistant rated performance¹, the best rating available for roofing products. Our material is warranted for hail up to 2-1/2" inches in diameter and winds up to 120 mph², helping protect your home while adding peace of mind. According to an April 2015 analysis by State Farm, hail and wind damage cost the insurer and its policy holders more than \$2.4 billion in 2014³.

Beautifully Efficient

Whatever the style, color or finish of your current roof, a Unified Steel™ Stone Coated roof can further enhance the appearance of your home. Whether you want the look of shingle, clay tile, cedar shake or slate, you can select a Unified Steel™ roof that will highlight the beauty and increase the efficiency of your home. It will look beautiful for decades to come and requires little to no maintenance to provide a lasting improvement to your home's curb appeal.

89°
Attic Temperature¹

Why Steel?

Energy-Efficient

Attic temperatures measured using identical heat sources simulating the sun's radiation comparing Unified Steel™ Stone Coated Roof System with Above Sheathing Ventilation (ASV) to a common asphalt shingle installation. The result is less heat in the attic and lower energy bills.

PINE-CREST

Engineered to replicate hand-split wood shake with the durability of steel.

Unified Steel™ Accessories

Unified Steel™ offers a wide range of innovative accessories for all of its panel profiles. It is these simple yet well-designed parts and pieces that provide a perfect finish to any roof.

Have you considered what is underneath your roof? **Unified Steel™ Cool Roof System**

These components provide energy efficiency and give great return on your investment.

Unified Steel™ Stone Coated Panel

MetalSeal HT Underlayment

EBS Battens

Direct-to-Deck

Continuous Ridge Vent

Above-Sheathing Ventilation (ASV)

Hot air always rises and creates a natural convection effect. This allows the heated air to be exhausted through ventilation, which causes a continuous airflow across the roof deck. The result is a cooler attic and living space in the home.

No matter the install method, Batten with Elevated Batten System® (EBS) battens or Direct-to-Deck, a Unified Steel™ Stone Coated roof with ASV can help provide energy savings compared to asphalt shingles.

The Oak Ridge National Laboratory (ORNL) conducted a 12-month study on the effects of high IR pigments vs. metal roofs installed with an airspace*. The study showed that EBS or ASV can reduce heat flow into a building by nearly 30%. This can lead to an increase in year-round energy efficiency by reducing heat gains during the summer and heat losses during the winter. These dramatic results prove ASV is just as important to achieving energy efficiency as reflective roofs.

Hot air rises and is vented off the roof.
